Calgary, AB • nooraliiyc@gmail.com • GitHub • LinkedIn

SKILLS

Languages: Python, SQL, C/C++, Java, JavaScript, TypeScript, HTML, CSS, MicroPython

Frameworks & Libraries: React.js, Next.js, Node.js, Express, Tailwind CSS, Vite, Pandas, NumPy

Databases & Backend: SQL, PostgreSQL, Supabase, REST APIs, Database Schema Design, Firmware/Embedded Systems

Data & Analytics: Power BI, DAX, Power Query, SQL, PostgreSQL, Python (Pandas, NumPy), Microsoft Excel, Dashboard Development, Data Visualization, Data Manipulation, Reporting

Product Skills & Tools: Jira, Notion, Figma, Canva, A/B Testing, User Research, Competitive Analysis, Usability Testing, Roadmapping, Backlog Prioritization

Tools & Practices: Git/GitHub, Linux, Jira, Agile/Scrum, PyTest, JUnit, CI/CD, Test-Driven Development, Debugging, Version Control, Claude Code, Cursor

Methodologies: Process Improvement, Workflow Analysis, Stakeholder Management, Requirements Gathering, Agile/Scrum, UI/UX Design Principles

Office & Collaboration: Microsoft Office Suite (Excel, PowerPoint, Word), Google Suite, Slack, Photoshop

EXPERIENCE

Dr. Quan & Associates, Optometrist

Jul 2022 – Present

Office Administrator

Calgary, AB

- Analyzed the pretesting and patient intake workflow to identify bottlenecks and redesigned the **business process**, increasing clinic throughput from 3 to 4 patients per hour (+33%)
- Trained coworkers on the redesigned intake workflow to drive adoption of the **process improvement** across the front office
- Managed scheduling and daily operations for 250+ patient appointments per week using **RevolutionEHR**, a practice management platform, and troubleshoot office technology issues
- Coordinated referral tracking and communication across 20+ specialist clinics, maintaining accurate **records** for timely patient follow-up

WayBionic

June 2026 – Present

VP Internal

Calgary, AB

- Led scope and delivery of the team's official website, managing a **backlog** and running **sprint planning** in **Jira** to sequence design work and coordinate handoffs, with **Figma** for design
- Developed and **presented a cross-functional recruitment strategy** to engineering sub-team leads, iterating each cycle based on **retrospective data** and structured outreach to grow membership from 30 to 64 (+113%)
- Used **AI tools** to establish brand guidelines and led marketing campaigns that grew social following by 100+ in 3 months

Electrical & Software Engineering Students' Society (ZOO)

May 2026 – Present

Co-VP Internal

Calgary, AB

- Manage a team of 4, coordinating all **marketing and operations** for a society of 1,300+ members and 1,500+ Instagram followers
- Set design and accessibility standards for all event posts, keeping the society's promotion consistent and inclusive

University of Calgary Solar Car Team

Oct 2024 – Apr 2025

Telemetry Member

Calgary, AB

- Built a 12-channel sensor **telemetry and performance-monitoring system** for a solar vehicle that competed in the American Solar Challenge 2026
- Queried and extracted performance metrics from telemetry data using **SQL** to validate hardware behavior and support cross-subteam **analysis and reporting**
- Gathered and reconciled telemetry **requirements** from 8 subteam **stakeholders** against technical capacity and deadlines, communicating trade-offs to gain alignment and keep deliverables on schedule
- Built and tested the team's public-facing website using **React** and **TypeScript**, managing code collaboration and version control through **GitHub**

Anything but JUNK

Jan 2024 – Feb 2025

Lead Software Engineer

Calgary, AB

- Sole software and firmware engineer on two autonomous embedded systems, a self-watering garden and an obstacle-navigating race car, written in **MicroPython**
- Integrated **IR, pH and moisture sensors** into control logic, coordinating interfaces with separate mechanical, electrical and business subteams
- Delivered a completed, working race car build that passed all race requirements

Calgary eSports United

Aug 2022 – Mar 2024

Founder / President / Director of Communications

Calgary, AB

- Scaled the organization to 1,500+ members over 19 months by executing **data-driven** user acquisition and retention strategies
- Directed the design of desktop and mobile websites in **Figma**, running **sprint planning** to sequence design work and driving a 15% increase in event attendance and new-member conversion over 3 months
- Ran a mixed-methods **user research** process (15 interviews, 100+ surveys, 3 usability testing rounds) and translated findings into a **prioritized backlog** that improved community engagement by 30%
- Led **competitive and market trends analysis** of collegiate esports organizations, **presenting findings to leadership** and translating them into prioritized initiatives that shaped the org's strategy and roadmap

PROJECTS

- VCT 2025 Player Analytics** | *Power BI, DAX, Power Query, Python (Pandas)* Oct 2026
- Built a 3-page interactive **Power BI dashboard** on 9,800+ pro VALORANT match records, with slicers, KPI cards and dynamic titles so users can explore agent, player and team performance
 - Cleaned the raw data in **Python (Pandas)**, removing double-counted rollup rows and recovering 6,200+ values corrupted by Excel, validated against 100% of source records
 - Wrote **DAX** measures for round-weighted averages, pick rates and league benchmarks, and added a role dimension in **Power Query** for **data modeling**
- Ramble** | *Next.js, Supabase (PostgreSQL), Claude API* Aug 2026
- Built and shipped a **full-stack**, AI-powered journaling web application end-to-end with an **LLM-based sentiment analysis pipeline**
 - Designed the **database schema** and **REST API** endpoints in Supabase for authenticated data storage and retrieval
 - Built an **NLP-based sentiment analysis** pipeline on journal entries, aggregating results into weekly/monthly emotional **trend summaries** for users
 - Built the **product strategy** and business case for the v2 roadmap, benchmarking journaling and productivity apps' UX patterns to **prioritize features** and shape **go-to-market positioning**
- LockedIn** | *React.js, Node.js, Tailwind CSS, Figma* July 2025 – September 2025
- Built a **full-stack** in-house match management tool for League of Legends teams, including draft management and **session analytics** tracking
 - Wireframed and iterated on the UI across multiple design rounds in **Figma**, incorporating feedback gathered from surveys
 - Validated design decisions through hands-on usability testing, debugging and refining the draft and session-management flows based on user feedback
- JAppL** | *Brand & Product Design, Figma, Canva* 2024
- Designed the brand and product concept for a Japanese learning app for casual learners, including logo, typography, palette, mascot and a seed-to-tree progress system for streaks
 - Benchmarked Duolingo, LingoDeer and Anki and their user reviews to set direction, and pushed back on scope cuts to protect the app's playful, gamified feel for the target audience

EDUCATION

- University of Calgary**
- *Bachelor of Science, Software Engineering* Sept 2024 – Expected: Jun 2028
 - *Bachelor of Science, Biological Sciences* Sept 2019 – Jun 2023
